ZODIAC
MILPRO

We believe that successful projects are based on mutual trust, built on enduring business relationships, and shaped by teams who are prepared to give their best. Our challenge is to realise workable solutions, even for our customers' most demanding requirements. We achieve this by working closely with owners and/or their representatives. The design and construction of our tenders benefit from our expertise and innovation in all areas of production. Our main focus in the engineering of our tenders is not just their design, but also their ease of handling in everyday use, which is so important for the crew and owner.

Our use of only the highest quality materials, our company's many years of experience in megayacht construction and the diverse technical facilities at our yard allow us to meet the very highest quality demands. We are proud that a megayacht carrying a yachtwerft meyer tender or equipment can now be found in nearly every port on the planet. The many satisfied owners and crews are our biggest endorsement and our motivation for continuing to build unique "made in Germany" products in the future.

ZODIAC MILPRO GROUP

ZODIAC
MILPRO

Since 1896, Zodiac Milpro has been designing innovative products in the Military and Professional field for "those who work on the water".

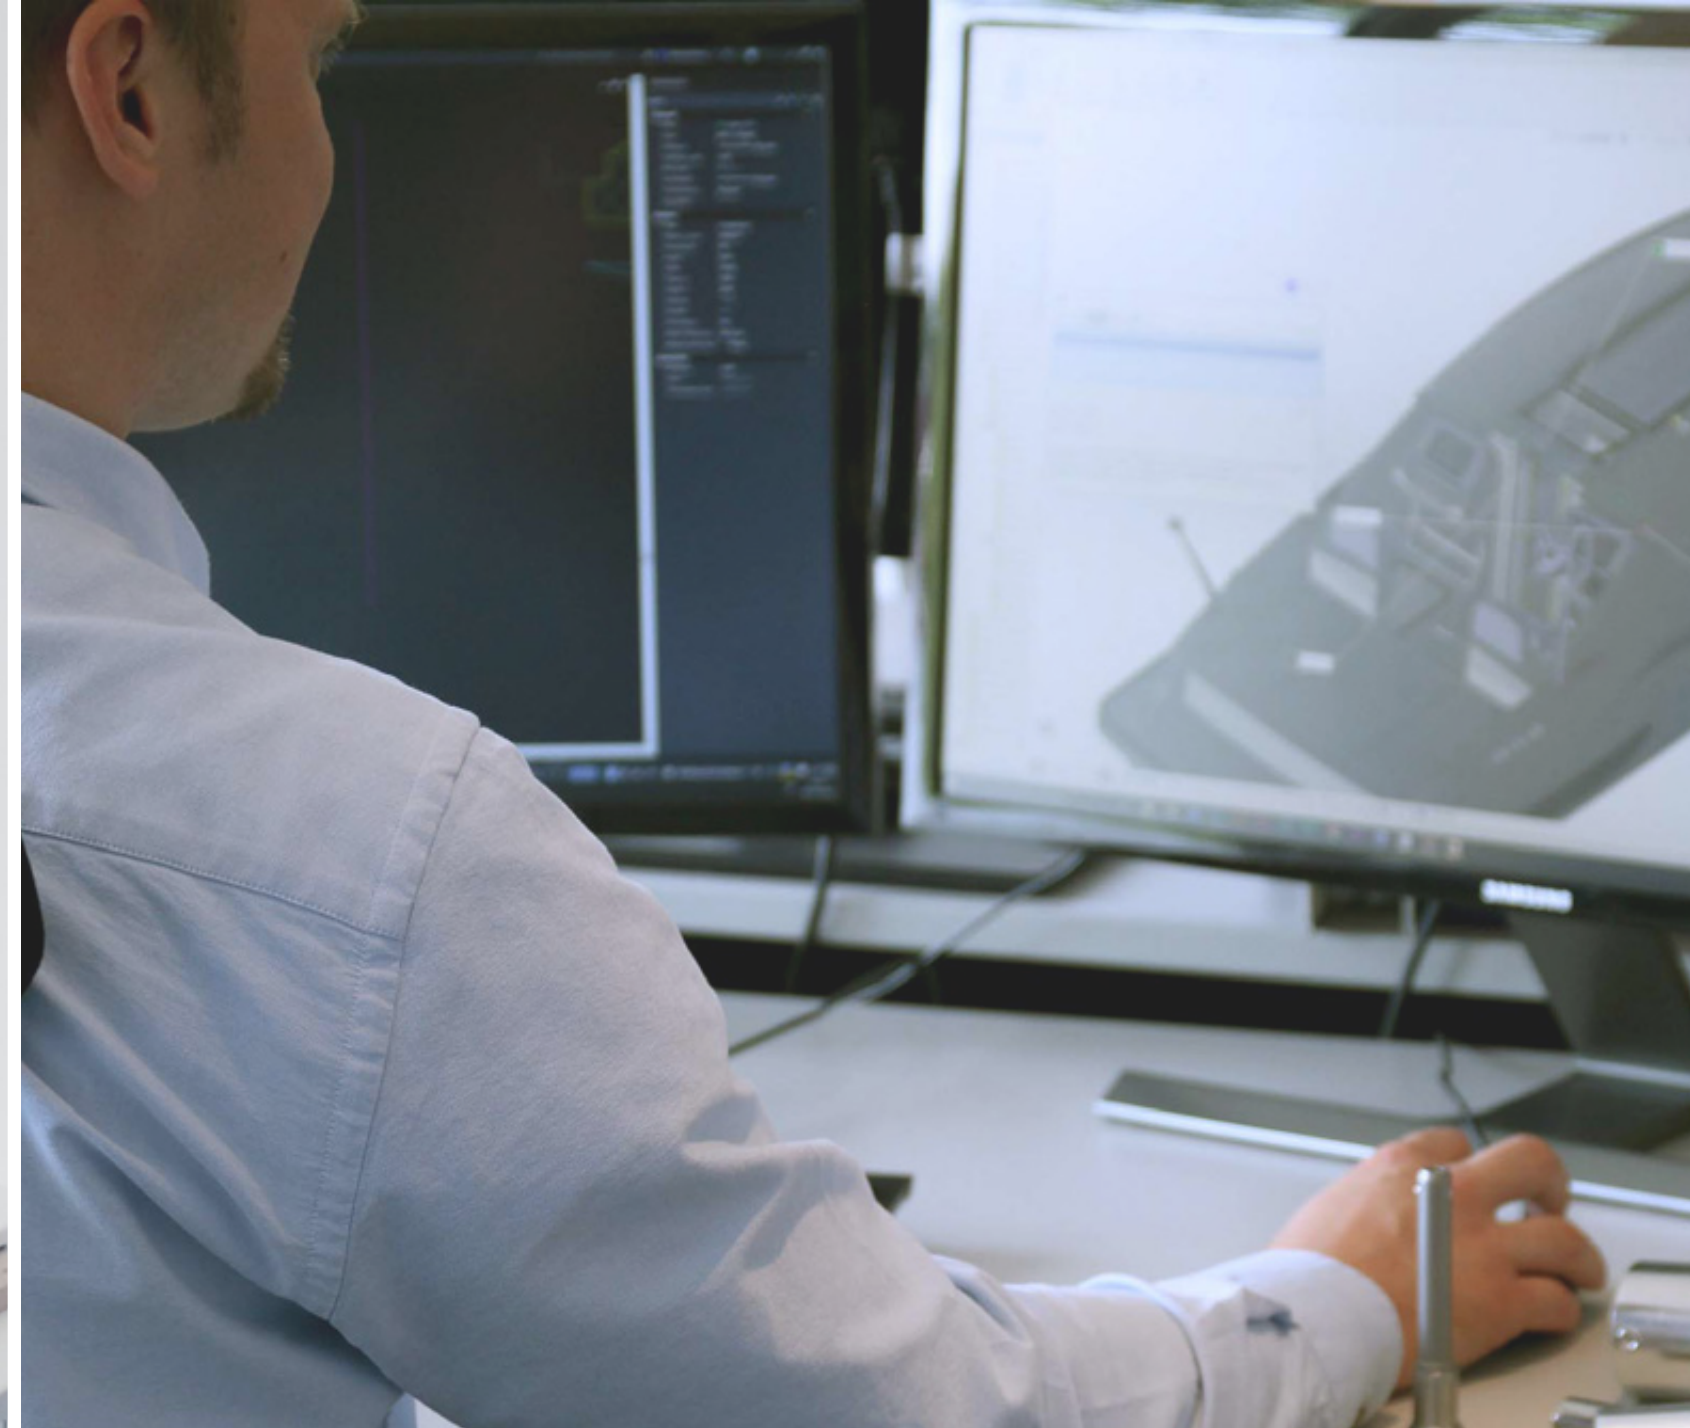

Zodiac Milpro has originated most of the major concepts that have driven the development of the modern inflatable boat since the 1930s. Since those early days, Zodiac Milpro has become the main manufacturer of inflatable and semi-rigid boats for Professional and Military applications.

As a French stand-alone group headquartered in Paris, Zodiac Milpro has more than 100 years of technical heritage and sets the standards for military and professional inflatable and semi-rigid craft.

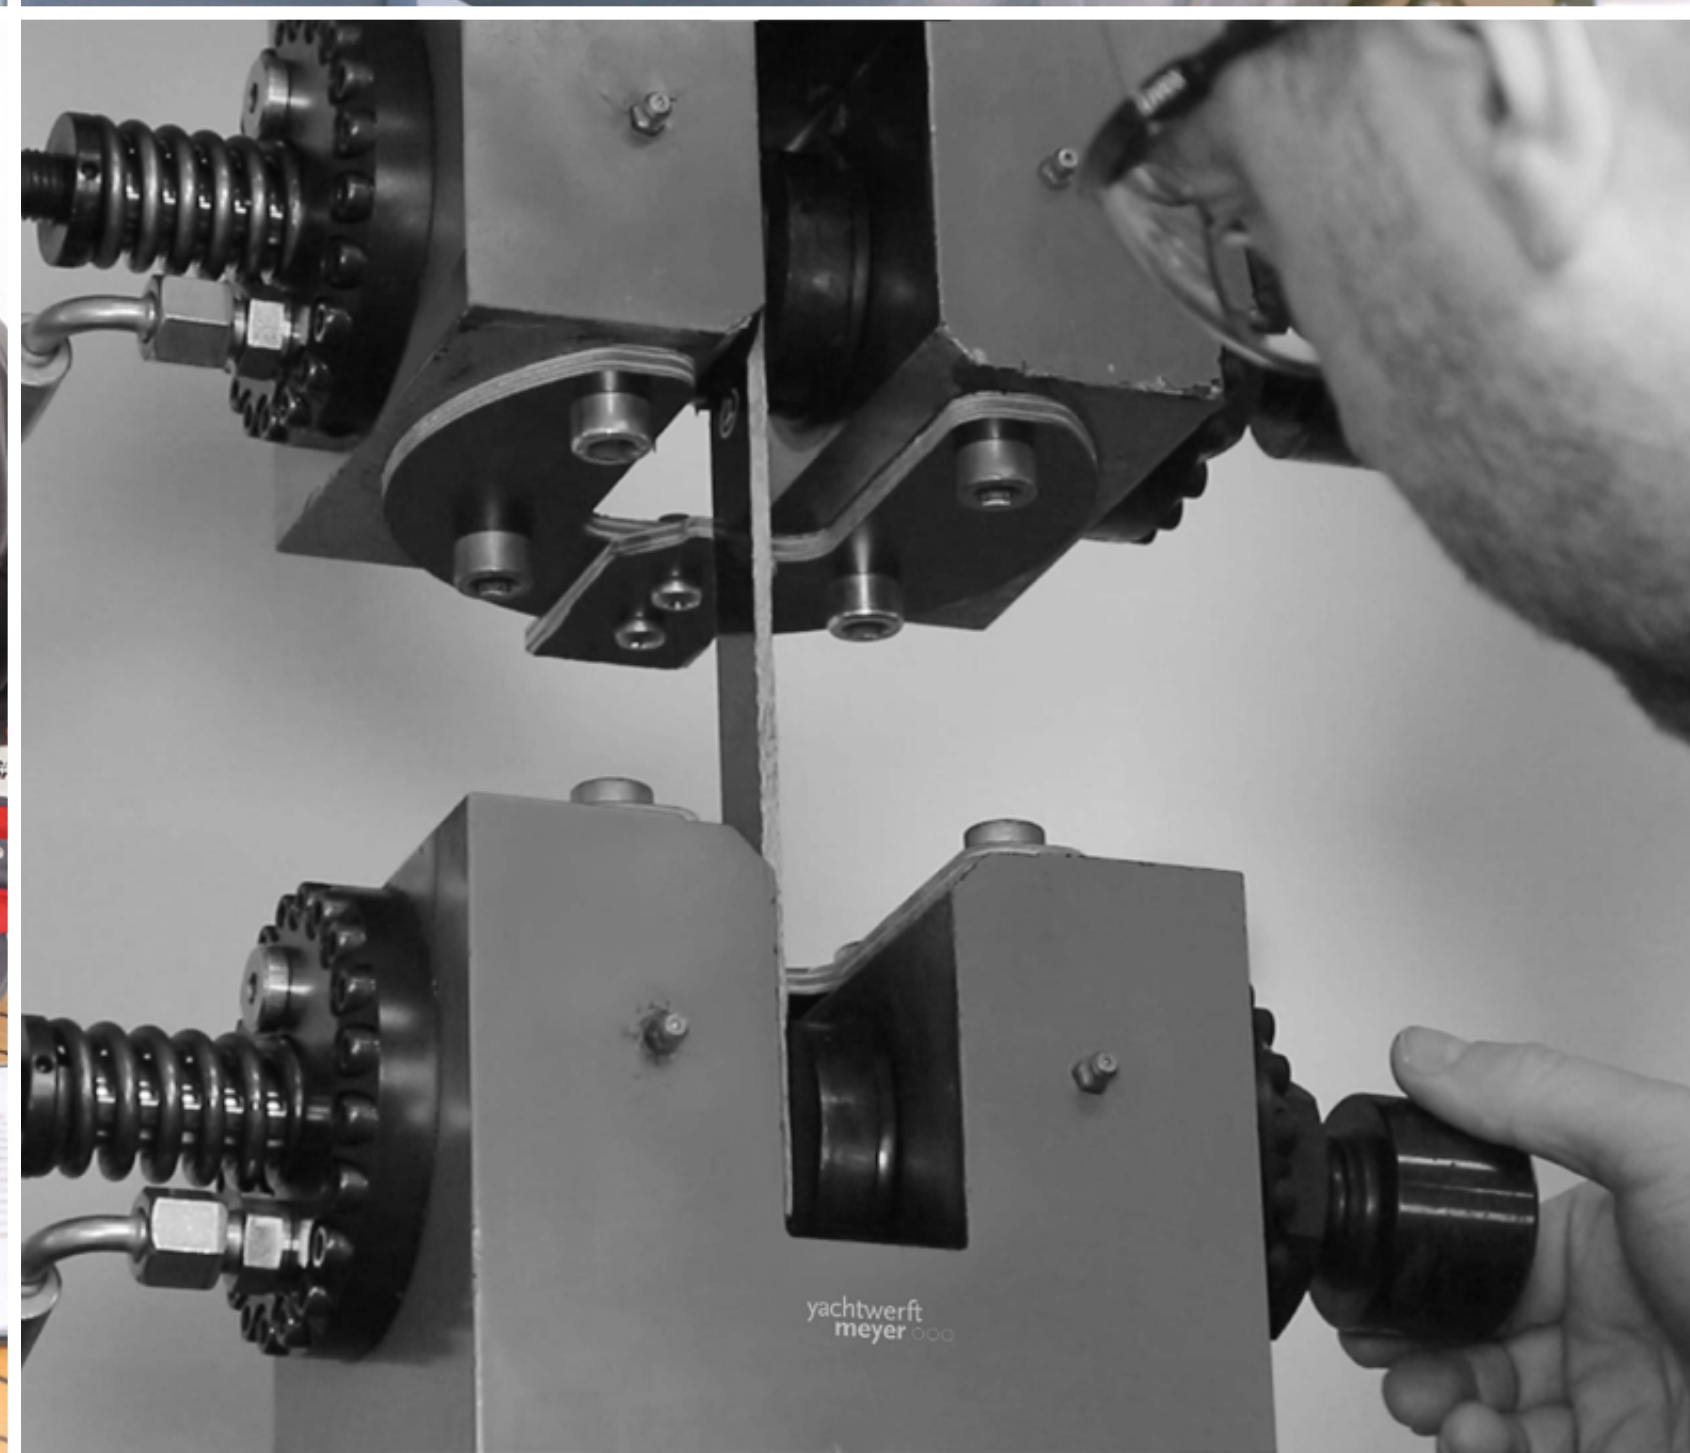

15.000 SQUARE METERS OF INDOOR AND OUTDOOR SPACE

IN-HOUSE DESIGN, ENGINEERING &

At yachtwerft meyer we offer full in-house design and engineering services. By using 3D parametric modelling and 3D scanning, we develop the best geometries, ergonomic forms, precise detailing and efficient layout designs. Our engineering services include:

- fibre composite engineering
- 3D parametric modelling
- hydrodynamics & resistance
- lamination schedules
- weight optimisation engineering
- production process planning
- mould design & engineering
- bespoke solutions for fire & ballistic protection
- and more...

IN-HOUSE DESIGN

It all starts with the first sketch...

Our clients make a large profit of our experienced inhouse design team...

In close collaboration with our engineering team many outstanding, individual designs are developed for our products.

FROM IDEA | TO PRODUCT

DETAILING

With attention to detail...

Individual products need sophisticated solutions in detail.

To meet even the most extraordinary expectations of our clients is our daily challenge.

BESPOKE CONCEPTS

We are future focused, so we are constantly exploring new shapes, concepts and opportunities to be developed in our *Signature* series.

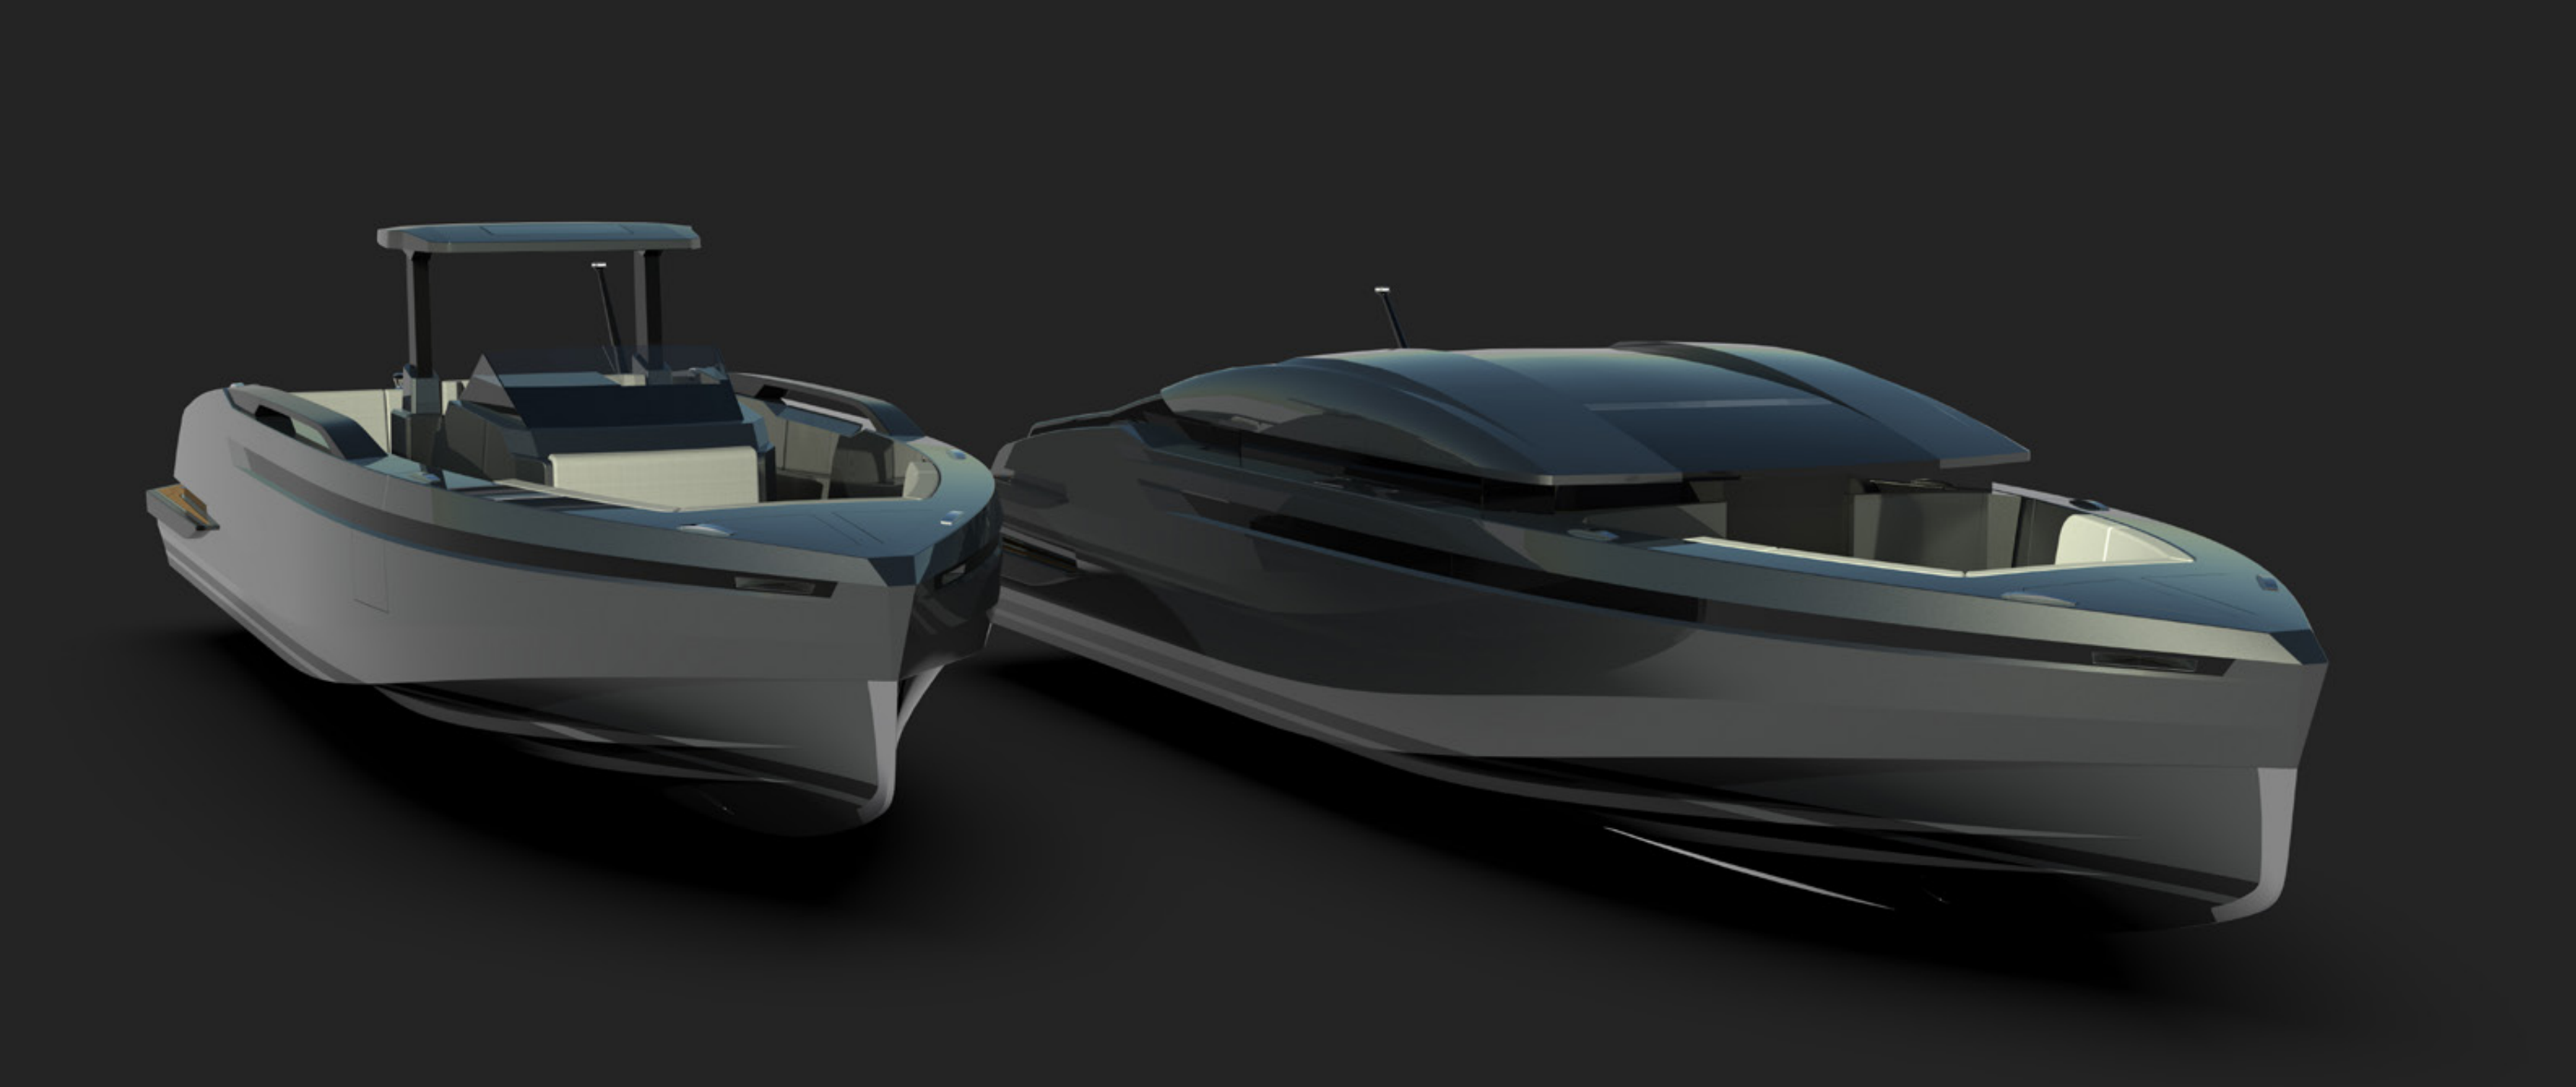

SOLAS SEMI-CUSTOM

SUPERYACHTING TENDERS

OOO
CC LINE

IMPETUS THE NEW SERIES

New series of semi-custom open and limousine tenders ranging from 10.5 - 12.0 meter.

Available with various deck layouts and many custom features offering a wide spectrum of configurable options.

The first tender is currently under construction and will be delivered in 2025.
