

WE ARE LOOKING FOR: **LAMINATOR** (PLASTICS PROCESSING)

yachtwerft
meyer ○○○

ABOUT OUR COMPANY:

Yachtwerft Meyer is a small sized business based in Bremen on the river Lesum. For more than 20 years on the market, we have built up a reputation as one of the leading companies worldwide for the construction of exclusive, high-quality, customised yacht tenders. Yachtwerft Meyer is also known for its innovative fibre composite products. Our customers include numerous private customers and public authorities as well as well-known industrial companies from the shipbuilding, automotive and aerospace sectors.

Since 2022, we have been part of the French Zodiac-Milpro Group, the world's leading manufacturer of high-performance and rigid-hull inflatable boats.

In addition to the construction of customised yacht tenders, our product portfolio also includes refits, maintenance work and design and engineering services.

We are looking for ambitious, highly motivated employees who appreciate our cosmopolitan, international corporate culture as a responsible, success-orientated company and would like to work with us to further expand our international success.

YOUR PROFILE:

- Completed apprenticeship as a fibre composite worker or, alternatively, initial professional experience in boat building or wind turbine construction.
- High resilience, motivation and ability to work in a team.
- Forklift licence an advantage, but not essential.
- Good knowledge of German.

YOUR SKILLS:

- Skilled craftsmanship
- Independent and responsible approach to work, high level of commitment
- Physical resilience
- Understanding of technical drawings, 2D and 3D visualisation skills

DAILY CHALLENGES:

- Prepare, clean and sand laminating moulds, apply release agent
- Cut fibre composites, plastics and fibreglass mats to size
- Mix reaction resins according to recipe, e.g. with hardeners
- Coat moulds or components with fibre composites or reaction resins
- Remove laminated workpieces from the mould after curing
- Finish products by cutting, sanding or polishing, if necessary
- Assemble finished products using welding, adhesive bonding or other joining techniques
- Carry out repair work on laminated moulded parts
- Document the individual production steps and ensure compliance with quality standards

PLEASE SEND YOUR APPLICATION DOCUMENTS TO:
